

Dear Hiring Committee,

I am writing to express my strong interest in the Research Assistant position at FLAME University, with a specific focus on Large Language Models (LLMs). This opportunity strongly aligns with my goal of building advanced expertise in artificial intelligence and language technologies.

My academic background has provided me with a solid foundation in machine learning, deep learning, and natural language processing. I have practical experience working with Python and modern AI frameworks such as PyTorch, TensorFlow, and Hugging Face Transformers. I am particularly interested in LLM-related areas such as prompt engineering, fine-tuning, retrieval systems, model evaluation, reasoning pipelines, and intelligent AI assistants.

I actively follow recent developments in language models and enjoy exploring how these systems can be applied to solve real-world challenges involving automation, question answering, text understanding, summarization, and decision support. I also enjoy reading technical papers, experimenting with new methods, and improving model performance through structured testing and iteration.

What excites me most about this role is the opportunity to work closely with faculty and researchers on impactful projects while contributing to experimentation, benchmarking, technical documentation, and collaborative problem-solving. I am eager to learn in a research-driven environment and contribute with dedication and consistency.

I believe this role would be an excellent platform for me to strengthen my technical and analytical skills while contributing meaningfully to ongoing LLM-focused initiatives. I would be grateful for the opportunity to be considered for this position.

Thank you for your time and consideration.

Sincerely,
Shruti Kumari
